

PRODUCT BULLETIN

ARB SINGLE AND DOUBLE INFLATION CASES

DATE	January 2026
DESCRIPTION	New ARB Inflation Cases
PART NO.	ARB4298 - ARB Single Inflation Case ARB4299 - ARB Double Inflation Case
AVAILABILITY	May/June 2026

Note: the Single Inflation Case (PN ARB4298) will replace the previous generation of the product (PN ARB4297) only after current stock is sold.

OVERVIEW

ARB is expanding its air management range with the release of two new Inflation Cases, purpose-designed to carry, protect, and organise essential air system components.

Engineered for durability and convenience, the single case securely stores your air hose, blow gun, pressure gauge and additional air fittings in one compact solution. The double case holds everything the single case can plus an additional air hose and gauge. This range of new ARB Inflation Cases provide a practical, vehicle-ready way to keep your inflation equipment protected, accessible, and ready for use wherever the adventure takes you.

FEATURES

All new, minimal design including a rigid internal case structure that holds its shape whether empty or full.

Comfortable grab handle and additional rear mount straps for MOLLE type attaching.

Webbed internal pockets for easy visibility of stored items.

FEATURES

Single and double case options to suit all customer requirements.

The double case features an adjustable divider in the hose pocket area to suit two hoses or other larger items.
